- C. All shareowners have the same right to participate in the governance of the company, with founding shareowners normally given the right to veto certain resolutions.

13. A company provides the following information :

Credit sales \$125 million

Cost of goods sold \$80 million

Accounts receivable \$15 million

Beginning Inventory \$16 million

Ending Inventory \$22 million

Accounts payable \$13 million

The operating cycle and net operating cycle are closest to:

<u>Operating cycle</u>	<u>Net operating cycle</u>
A. 108.2	53.1
B. 144.2	84.9
C. 144.2	89.0

14. It is assumed that sales and related costs are growing at 5% per annum and there is no change in capital structure, then National Telecom Corporation's proforma net income in 2008 is closest to:

- A. \$ 51.25 million.
- B. \$ 54.00 million.
- C. \$ 56.00 million.

15. The asset allocation of investors between equities and fixed income in the major international capital markets is:

- A. very similar, since investors are using the same optimization models.
- B. quite different, since investors are making decisions in different economic and social environments.
- C. Very similar, since asset allocation is the most important step in portfolio construction in all major market.

16. The beta of an asset:

- A. lies between -1 and 1.
- B. is a measure of unsystematic risk.
- C. is 1 if the asset is the market portfolio.

گروه الف

17. If a stock lies above the security market line (SML) this would indicate that the stock:

- A. is overvalued.
- B. is undervalued.
- C. has a higher expected return than the market.

18. Which of the following types of capital budgeting projects are most likely to generate little to no revenue

- A. Regulatory projects .
- B. Replacement projects to maintain the business .
- C. New product or market development .

19. One of the basic principles of capital budgeting is that:

- A. decisions are based on cash flows, not accounting income .
- B. cash flows should be analyzed on a pre-tax basis .
- C. opportunity costs should be excluded from the analysis of a project .

20. If two projects are mutually exclusive, a company :

- A. can accept either project, but not both projects .
- B. must accept both projects or reject both projects .
- C. Can accept one of the projects, both projects, or neither project

21. Kendra Jackson, CFA, is given the following information on two stocks, Rockaway and Bridgeport .

Covariance between the two stocks = 0.0325

Standard Deviation of Rockaway's returns = 0.25

Standard Deviation of Bridgeport's returns = 0.13

Assuming that Jackson must construct a portfolio using only these two stocks, which of the following combinations will result in the minimum variance portfolio?

- A. 100% in Bridgeport .
- B. 50% in Bridgeport, 50% in Rockaway .
- C. 80% in Bridgeport, 20% in Rockaway .

22. Which of the following sources of short-term liquidity is considered reliable enough that it can be listed in the footnotes to a firm's financial statements as a source of liquidity ?

- A. Revolving line of credit .
- B. Factoring agreement .
- C. Uncommitted line of credit.

گروه الف

23. Plunger Company's accounts payable department receives an invoice from a vendor with terms of 2/10 net 30. If Plunger pays the invoice on its due date, the cost of trade credit is closest to :

- A. 44.6% .

- A. business risk .
- B. internal risk .
- C. financial risk.

29. Which one of the following statements about the marginal cost of capital (MCC) is most accurate?

- A. A breakpoint on the MCC curve occurs when one of the components in the weighted average cost of capital changes in cost .
- B. The MCC is the cost of the last dollar obtained from bondholders .

گروه الف

C. The MCC falls as more and more capital is raised in a given period.

30. The marginal cost of capital is:

- A. the cost of the last dollar raised by the firm .
- B. tied solely to the specific source of financing .
- C. Equal to the firm's weighted cost of funds.

31. When using net present value (NPV) profiles:

- A. one should accept all independent projects with positive NPVs .
- B. the NPV profile's intersection with the vertical y-axis identifies the project's internal rate of return .
- C. one should accept all mutually exclusive projects with positive NPVs.

32. A publicly traded company has a beta of 1.2, a debt/equity ratio of 1.5, ROE of 8.1%, and a marginal tax rate of 40%. The unlevered beta for this company is closest to:

- A. 0.632 .
- B. 1.071 .
- C. 0.832.

33. Financial risk is borne by :

- A. common shareholders .
- B. creditors .
- C. managers.

34. Which of the following statements regarding the impact of financial leverage on a company's net income and return on equity (ROE) is most accurate?

- A. Using financial leverage increases the volatility of ROE for a level of volatility in operating income .
- B. If a firm has a positive operating profit margin, using financial leverage will always increase ROE .
- C. Increasing financial leverage increases both risk and potential return of existing bondholders .

35. If a project has a negative cash flow during its life or at the end of its life, the project most likely has:

- A. more than one internal rate of return .
- B. a negative internal rate of return .
- C. multiple net present values.

36. Ashlyn Lutz makes the following statements to her supervisor, Paul Ulring, regarding the basic principles of capital budgeting:

گروه الف

Statement 1: The timing of expected cash flows is crucial for determining the profitability of a capital budgeting project.

Statement 2: Capital budgeting decisions should be based on the after-tax net income produced by the capital project.

Which of the following regarding Lutz's statements is most accurate?

	<u>Statement 1</u>	<u>Statement 2</u>
A.	Correct	Incorrect
B.	Correct	Correct
C.	Incorrect	Correct

37. The CFO of Axis Manufacturing is evaluating the introduction of a new product. The costs of a recently completed marketing study for the new product and the possible increase in the sales of a related product made by Axis are best described (respectively) as:

- A. sunk cost; externality .
- B. opportunity cost; externality .
- C. externality; cannibalization.

38. Which of the following types of capital budgeting projects are most likely to generate little to no revenue?

- A. Regulatory projects .
- B. Replacement projects to maintain the business .
- C. New product or market development.

39. Which of the following steps is least likely to be an administrative step in the capital budgeting process ?

- A. Arranging financing for capital projects .
- B. Conducting a post-audit to identify errors in the forecasting process .
- C. Forecasting cash flows and analyzing project profitability.

40. The process of evaluating and selecting profitable long-term investments consistent with the firm's goal of shareholder wealth maximization is known as:

- A. capital budgeting .
- B. financial restructuring .
- C. monitoring.

41. Assume that a 30-day commercial paper security has a holding period yield of 0.80%. The bond equivalent yield of this security is:

- A. 9.73% .
- B. 9.60% .
- C. 10.12%.

گروه الف

- 42. A result that is most likely to give a financial manager concern that his firm's credit policy may have become too lenient is :**
- A. weighted average collection period has increased .
 - B. receivables turnover has increased significantly .
 - C. inventory turnover has decreased considerably.
- 43. Stock A has a standard deviation of 10%. Stock B has a standard deviation of 15%. The covariance between A and B is 0.0105. The correlation between A and B is:**
- A. 0.55.
 - B. 0.25.
 - C. 0.70
- 44. ABC Corp. issued nonconvertible, non-callable preferred stock last year at an issue price of \$100; it pays a dividend of \$5 per annum. The stock is now trading at \$110. The company's marginal tax rate is 40%. The cost of preferred stock for ABC Corp is closest to:**
- A. 2.7%.
 - B. 3.0%.
 - C. 4.5%.
- 45. The beta of ABC's common stock is 1.1, the dividend paid is \$3.50, and the stock price is \$82.00. The expected market return is 12% and the risk-free rate is 6%. The cost of equity is closest to:**
- A. 4.3%.
 - B. 6.6%.
 - C. 12.6%.
